Eagle Harbor Sewer Beach Main Replacement Project –

1st Transfer of Sewer Main – 09/22/14

The Contractor for the Eagle Harbor Sewer Beach Mains Replacement project will be transferring an existing sewer main to a newly constructed 12-inch sewer main on **Monday, September 22nd (Daytime)**. This will be the first transfer of three main replacements. Notifications will be sent and posted prior to each sewer main transfer.

Due the nature of the work, it will be necessary to limit vehicle movement in the areas of Harborview Drive, Hawley Way and Irene Place. Pumper trucks will be needed to hold the flow from the existing main and then transfer to the treatment plant. Please do not park on Irene Place to allow pumper trucks access to the pump station.

For updates on the project, please visit www.bainbridgewa.gov/271

or to sign up for project notifications by selecting “Notify Me”.

Thank you for your continued patience and support throughout the duration of this very important sewer main replacement project.
